

**FRIGORIFICO CONCEPCION S.A.**  
**STATEMENT TO THE LOCAL AND INTERNATIONAL MARKET**  
**Incident at the Concepción facility**

- 1- The incident that occurred in our industrial facilities in Concepción last Thursday, November 19, 2020, which caused the leakage of liquid effluent through a sector of the outer wall adjacent to the Paraguay River, was completely corrected, taking all relevant safety measures.
- 2- Because of the incident, the Ministry of Environment and Sustainable Development (MADES) ordered the temporary suspension of the activities of the industrial plant, in order to verify the causes of the problem and the corrections made in the facilities to avoid similar situations. The plant's activities were suspended on November 24 to allow a team from MADES and the Public Ministry to carry out their investigations at the facility. Our personnel were accompanying and collaborating with the public authorities at all time.
- 3- The necessary measures have been taken to avoid any similar event could happen again, which was confirmed jointly with MADES, who have proceeded to lift the suspension, considering the fact that the safety and environmental protocols are functioning correctly.
- 4- **Since November 25th, the Concepción facility has been working normally.**
- 5- We assure that we will continue to collaborate with public institutions and control authorities as part of our commitment to the public to maintain our standards of quality and respect for the environment.

November 26, 2020.
